

LAUAK

Long-haul partner for leading aerospace companies

A FEW WORDS FROM THE BOARD

Despite a complex period linked to recruitment difficulties and significant inflation, LAUAK group demonstrates resilience.

2023 is the year of recovered performance, both operational and financial.

In order to do so, we conduct an ambitious multi-year plan on several workstreams:

- Implement an operational excellence system that enables us to support ramp-ups and become a high-performing supplier, on time and on quality.
- Restore our financial performance to carry on investment, maintain our independence and assert our position as a sector consolidator.
- Establish a culture of empowerment and build our appeal to recruit, grow and hold talents.
- Gain competitiveness by deploying a digital transformation plan and an international industrial strategy mainly thanks to our plants in India and Mexico.
- Offer a differentiating offer by proposing the state-of-the-art technical expertise on our niche activities.

Aware of our strengths and our improvement axes, we approach the future with ambition and optimism.

We know that we can count on qualified and passionate employees as well as on our trusted customers to open a new period of development and growth.

« The flexibility of a company, the strength of a group »

TUBES AND PIPES - p.16

MECHANICAL-WELDED - p.20

STRUCTURAL ASSEMBLY - p.24

SHEET METAL

MEANS

- 2-axes laser punching and trimming machines
- 5-axes lasers trimming machines
- Folding/Rolling machines
- Sandblaster/Shot peening machines
- Hand forming traditional equipments
- Heat-treatment furnaces of aluminum
- Double and triple-action stamping presses
- Rubber presses 200 bars
- High-pressure fluid cell presses 800 bars
- TIG, MIG, Laser, Seams, Spot welding stations
- Automatized digital and analog radiography cabins
- Penetrant testing lines
- Surface treatment lines (TSA, CAA, Passivation, CCC, Pickling, Degreasing)
- Paint cabins

PROCESSES

- Laser and Machining Trimming/Punching
- Aluminum Heat treatment
- Stamping/Pressing/Folding/Rolling
- Cold forming
- Hand, Automatized and Orbital welding
- Non-destructive testing (X-ray, dye penetrant inspection)
- Surface treatment and painting
- Sub-assembling/Fastener installations

AEROSTRUCTURES GMBH

HOT FORMING

MEANS

- 2-axes and 5-axes lasers trimming machine
- 3 presses capable for HF* and SPF**
- Tool preheating oven
- Counterskin cobots

HF (Hot Forming)*

Deformation by punch/die tooling
allowing elongations up to 50%

PROCESS

- Laser trimming
- Hot Forming*
- Superplastic Forming**
 - From 650 ° to 940 °
 - Up to 800 tons max press capacity
 - Up to 1800 x 1500 max platen capacity
- Sub-assembling/Fastener installations

SPF (Superplastic Forming)**

Deformation by dies and stamping
by gas punch (Argon inert gas)
allowing elongations up to 500%

M88 - SAFRAN AIRCRAFT ENGINES

MACHINING

MEANS

- 40 machining centers from 3 to 5 axes small and large dimensions (up to 4m)
- Combined Lathe-Milling centers (horizontal and vertical, 5-axes)
- Milling centers with automatized Pallet-Changing
- Shot peening machines
- Three-dimensional measuring machines
- Scan box
- Penetrant testing lines
- Surface treatment and Painting lines

PROCESSES

- Turning
- Milling
- Prestressing shot peening
- Dimension measurement and scanning
- Non-destructive testing (dye penetrant inspection)
- Bearing installation
- Assembly
- Surface treatment and painting

TUBES AND PIPES

MEANS

- 10 electric bending machines
- Photometry control equipment
- Automatic and Hand TIG welding equipments
- Tube end finishing means
- Swaging equipments
- Pressure bench test
- Surface treatment and Painting lines

PROCESSES

- Tube bending
- Welding
- Ducts crimping (Wiggins, Permaswage, Harrison, Deutsch)
- Non-destructive testing (dye penetrant inspection)
- Surface treatment and painting

TUBES AND PIPES

LAUAK

MEANS

- 2-axes laser, machining, punching and trimming machines
- 5-axes laser, machining trimming machines
- Double and Triple-action stamping presses
- TIG, MIG, Laser, Seam, Spot welding stations
- Combined Lathe-Milling centers (horizontal and vertical, 5-axes)
- Milling centers 5-axes
- Automatized digital and analog radiography cabins
- Penetrant testing lines
- Surface treatment lines
- Paint cabins
- Welding training center, managed by Lauak experts certified « International Welder Engineer and Inspector »

PROCESS

- Laser trimming and drilling
- Heat treatment
- Cold Forming
- Hand, automatized, orbital welding Machining
- Non-Destructive Testing (X-ray, dye penetrant inspection)
- Dimension measurement
- Surface treatment and painting
- Sub-assembling/Fastener installations
- Qualiopy training certification
